Progress in Surface Science

EDITOR-IN-CHIEF:
PROF. SYDNEY G. DAVISON

MANAGING EDITOR:
PROF. WING-KI LIU

EDITORIAL SECRETARY:
PRUDENCE G. DAVISON

EDITORIAL OFFICE
Applied Mathematics Department
University of Waterloo
Waterloo, Ontario
Canada N2L 3G1

Tel: **(519) 888-4533**
Fax: **(519) 746-6530**
e-mail: **pdavison@watdcs.uwaterloo.ca**

ADVISORY BOARD

I. BARTOŠ
Academy of Sciences
Prague, Czechoslovakia

B.E. CONWAY
University of Ottawa
Ontario, Canada

A.S.G. CURTIS
University of Glasgow
Scotland

A.W. CZANDERNA
NREL
Golden, Colorado, U.S.A.

D.D. ELEY
University of Nottingham
England

P.J. ESTRUP
Brown University
Providence, Rhode Island, U.S.A.

V.E. HENRICH
Yale University
New Haven, Connecticut, U.S.A.

N.I. IONOV
Academy of Sciences
St. Petersburg, Russia

S. KONO
Tohoku University
Aobaku, Japan

J. KOUTECKY
Freie Universitat
Berlin, Germany

R.M. LATANSION
MIT
Cambridge, Massachusetts, U.S.A.

J.D. LEVINE
Texas Instruments
Dallas, Texas, U.S.A.

A.A. MARADUDIN
University of California
Irvine, California, U.S.A.

K. MULLER
University of Erlangen-Nurnberg
Germany

R. PARSONS
University of Southampton
England

J.B. PENDRY
Imperial College
London, England

S.T. PICRAUX
Sandia National Laboratory
Albuquerque, New Mexico, U.S.A.

T.N. RHODIN
Cornell University
Ithaca, New York, U.S.A.

M. STEŚLICKA
University of Wroclaw
Poland

H. TI TIEN
Michigan State University
East Lansing, Michigan, U.S.A.

H. UEBA
Toyama University
Japan

L. WEISS
Roswell Park Memorial Institute
Buffalo, New York, U.S.A.

R.F. WILLIS
Pennsylvania State University
University Park, Pennsylvania, U.S.A.

K. ZHANG
Fudan University
Shanghai, People's Republic of China

Publishing, Subscription and Advertising Offices: Pergamon Press Inc., 660 White Plains Road, Tarrytown, New York 10591-5153, U.S.A., INTERNET "PPI@PERGAMON.COM", and Pergamon Press Ltd., Headington Hill Hall, Oxford OX3 0BW, England.

Volumes 36-41 (24 issues). Annual institutional subscription rate (1992): £665.00 (US$1205.00); Personal subscription rate for those whose library subscribes at the regular rate: £142.00 (US$227.00). Sterling prices are definitive. US dollar prices are quoted for convenience only, and are subject to exchange rate fluctuation. Prices include postage and insurance and are subject to change without notice. Back issues of all previously published volumes, in both hard copy and on microform, are available direct from Pergamon Press. Subscription rates for Japan are available on request.

List of Contents, Volume 37, 1991

Catalytic Reactions and Reactors: A Surface Science Approach 1
by L.K. DORAISWAMY

AUTHOR INDEX

SUBJECT INDEX

Adsorbed state 12-29
  heats of adsorption 27-29
  Langmuir isotherm and
    anomalous character of 18-20 (right)
    assumptions of 19-20
    derivation of 13-16
    expression 16
    in two-dimensional equation of state 17-18
    parameter interrelations 17
    test of 20
  multicomponent extension of 20-22
  states of adsorption
    intrinsic and extrinsic 23-24
    trapping and sticking coefficients 22-23
  surface nonidealities in
    a priori heterogeneity: homotottic patch model 25-27, 28
    accounting for 25-27
    lateral 25
  two-dimensional phase 12-13
Adsorption. See also named type
  multicomponent 127-153
  multilayer 153-157
Adsorption and desorption kinetics 161-172
  adsorption rate equation forms 162-164
  QC approximation, applied
    adsoprtion 171-172
    desorption 169-170
  rate expressions with precursor states 164-168
    with interactions 167-168
    without interactions 164-165
Adsorption integral equation (AIE)
  approximate solutions 88-93
    asymptotically correct 92-93
    condensation 90-91
(Adsorption, approximate, cont.)
    Fourier series method 93
    general considerations 88-90
  class-1 solution
    comments 62-65
    exact methods 81-88
    isotherms and distributions 58-62

CHROMATOGRAPHIA

AN INTERNATIONAL JOURNAL FOR RAPID COMMUNICATION IN CHROMATOGRAPHY AND ASSOCIATED TECHNIQUES

Editors: **E R ADLARD,** *Delryn, Vicarage Lane, Burton, South Wirral L64 5TJ, UK* and **H ENGELHARDT,** *Angewandte Physikalische Chemie, Universität des Saarlandes, D-6600 Saarbrücken, Germany*

Present-day technology makes necessary the rapid exchange of information among professionals in the field of chromatography. Because of the difficulty in solving certain analytical problems quickly and economically using only one of the chromatographic methods, the combined use of varied techniques, such as gas chromatography and mass spectroscopy, yields more exact results. *Chromatographia* is a monthly, international journal that meets the vital demand for the quick spread of accurate, concise information concerning chromatography and related fields. This publication offers relevant papers in English, French or German, with accompanying titles, summaries and figure captions printed in all three languages.
Modern analytical problems place such great demands on the accuracy, sensitivity, speed and economy of the instruments that they can only be solved by close cooperation between theorists, users and instrument manufacturers, and to this end *Chromatographia* permits the rapid exchange of information.

TALANTA

THE INTERNATIONAL JOURNAL OF PURE AND APPLIED ANALYTICAL CHEMISTRY

Editors-in-Chief: **G D CHRISTIAN,** *Department of Chemistry, University of Washington, Seattle, Washington, USA* and **E H HANSEN,** *Department of Chemistry, The Technical University of Denmark, Lyngby, Denmark*
Chemical Sensors Section Editor: **W R SEITZ,** *University of New Hampshire, Durham, USA*

Talanta published monthly, provides a forum for the publication of original research papers, preliminary communications, and reviews in all branches of pure and applied analytical chemistry. Other features are analytical data (stability constants, etc.), and letters to the editors. Papers on fundamental studies and novel instrumentation developments are especially encouraged. Novel applications in areas such as clinical chemistry, environmental analysis, geochemistry, materials science and engineering, pharmaceutical and drug analysis, etc. are welcome. Since spectrophotometric measurements and applications are well established, studies in these areas should demonstrate a unique and substantial advantage over presently known systems (with respect to reagents or a particular application). Contributions will be expected to be of the high standard set and maintained by *Talanta* and to make a definite and useful contribution to analytical chemistry.

PROGRESS IN POLYMER SCIENCE

AN INTERNATIONAL REVIEW JOURNAL

Editor: **O VOGL**, *Polytechnic University, 333 Jay Street, Brooklyn, NY 11201, USA*
Associate Editor: **L S CORLEY**, *Shell Development Co, Westhollow Research Center, PO Box 1380, Houston, TX 77001, USA*

Progress in Polymer Science publishes state-of-the-art overview articles by internationally recognized authorities in polymer science and engineering, one of the fastest growing disciplines. The journal provides a link between original articles, innovations published in patents, and the up-to-date knowledge of technology. It publishes review articles on subjects not only within the traditional fields of polymer science and technology - chemistry, physics and engineering involving polymers - but also within interdisciplinary developing fields such as functional and speciality polymers, biomaterials, polymers and drug delivery, polymers in electronic applications, composites, conducting polymers, liquid crystalline materials and the interphases between polymers and ceramics, and new fabrication techniques, where significant contributions are being made. Contributors are usually invited by the editor; however, authors wishing to submit to the journal are encouraged to submit an abstract of their article to the editor.

A Selection of Papers

CHEMICAL ENGINEERING SCIENCE

Executive Editor: **J BRIDGWATER,** *School of Chemical Engineering, The University of Birmingham, Birmingham B15 2TT, UK*

The journal publishes papers on the fundamentals of chemical engineering, including applications of the basic sciences and mathematics. Subjects range from general chemical engineering principles to an analysis of particular industrial processes and may include analysis of problems arising in the processing of gases, liquids and solids, the development of new chemical processes, process design and plant design. The following are typical of topics: fluid mechanics, multi-phase flow and heat transfer in a chemical engineering context, mass transfer, applied reaction kinetics, process control, chemical thermodynamics, separation processes, fluidization, mechanics and statistics of mixing and mechanics of process equipment and machinery. In addition, *Chemical Engineering Science* publishes in new significant areas of research: biochemical engineering, solids technology, separation processes, particulate technology, processing of materials to achieve high performance, combustion and fuel utilization, process simulation, integration and control, environmental control, enhanced oil recovery, evaluation of physical properties and predictions for process design. The journal includes specially commissioned review articles and also publishes the annual P V Danckwerts Memorial Lecture, organized in association with the Institution of Chemical Engineers, and the biennial proceedings of the International Symposium on Chemical Reaction Engineering (ISCRE).

A Selection of Papers

X SING, L D SCHMIDT & R ARIS (USA), Steady states and oscillations in homogeneous reaction systems.

R D HOLSTVOOGD, J A VAN'T HOF & W P M VAN SWAAIJ (The Netherlands), A hollow fiber membrane probe for the measurement of the hydrogen concentration in a liquid.
